Good Morning Mr. Atiq,

I apologize for not getting back to you sooner, the opportunity to see my niece perform (sing) in Kansas City presented itself and the wife and I ran up there and back before the storm ...

I will give you a little history about Sharpline and our System 90. Once you have had a chance to review the materials, we can discuss your project in detail. I have also attached some drawings of previous canopy electrical requirements so you will have an idea how much electricity is needed.

System 90 is a 15'x 12" deep fully enclosed light cabinet that can be connected to additional cabinets to cover your canopy footage. Standard VO/OAH (opening) includes 24", 36", 42" , and 47". Please see the attached four-page brochure. I have also attached the installation manual which shows some of the required materials needed to make installation a success.

Do you have your design / artwork?

Do you know the dimensions of your canopy? How tall is the opening? How many sides are you considering lighting?

Do you know your corporate PMS colors, names, numbers?

May I have the address of the location being considered so I can goggle it?

This is just a sample of the information I will need to hopefully put a proposal together for you.

Best regards,

Geoff

Hi Geoffrey !

Thank you for your email. I would like to discuss canopy light requirements for my new built gas station in dallas can you please advice what day and time works best for you to connect and discuss.

Thank you

Good Afternoon Mr. Atiq,

My Name is Geoffrey and I received your contact information from Percy over at JKL. I just tried calling you to discuss your LED lighting needs and your voicemail is full. Now that you now have my contact info I would be thrilled to hear about your project.

When time permits, please feel free to call or email.

Best Regards,

Geoff
